PRODUCT CERTIFICATE

RARITY

- 1 – hour hand
- 2 – minute hand
- 3 – small second hand
- 4 – winding crown

- I – neutral position / position for winding the watch
- II – position for setting the time, the winding crown is fully pulled out

DESCRIPTION, DISPLAYS AND FUNCTIONS

Rarity wrist watches are fitted with a 3603 mechanical anti-shock manually wound movement.

1. WINDING

The watch is wound by turning the winding crown clockwise in the neutral position. Full winding- 23 turns of the winding crown. Stop rotating the crown as soon as you feel any resistance.

IMPORTANT: IF YOU CONTINUE TO WIND THE WATCH AFTER YOU FEEL RESISTANCE, YOU RUN THE RISK OF BREAKING THE TIP OF THE SPRING. IF THIS OCCURS, THE BARREL HOUSING THE MAINSPRING WILL NEED TO BE REPLACED AT THE OWNER'S EXPENSE.

The power reserve is approximately 40 hours. It is recommended that the watch be wound once a day.

2. SETTING THE TIME

Pull out the winding crown Set the time by turning the winding crown clockwise.

After setting the time return the winding crown to the neutral position by pressing until it is level with the case.

INSTRUCTIONS FOR USE, CARE AND STORAGE

1. WATER RESISTANCE

Rarity watches are water resistant to 10 ATM. This is a standard specification, which means the watch can withstand a pressure of 10 atmospheres. These watches are resistant to splashes, rain, and you can wash your hands wearing the watch. You can swim while wearing the watch and it can be submerged in water. However, these watches are not suitable for scuba diving. Please note that the winder must not be pulled out of the watch and the control buttons must not be pressed when the watch is wet.

IMPORTANT: PLEASE REMEMBER THAT YOU MUST NOT PULL THE CROWN OUT WHEN THE WATCH IS WET.

Over time, the seals will age and become worn, which will have a negative impact on the water resistance of the watch. We recommend that you have the condition of the gasket examined and the water resistance checked once a year by an authorized service center and have the seal replaced if necessary.

2. CARE

We recommend that you clean your watch regularly (apart from the leather strap) with a soft cloth moistened with warm soapy water.

3. PRECAUTIONS

- Never attempt to open the case or remove the back cover yourself.
- The rubber gasket protecting the watch from water and dust should be replaced at least once a year. It should be replaced as necessary, and this should only be done by an authorized service center.
- When immersing the watch in water, the winding crown should always be in the fixed/ tightened position.
- If any moisture gets inside the watch, immediately have its condition checked by an authorized service center.
- To not expose the watch to extreme temperatures: higher than 60 °C or lower than -5 °C. When the watch is being worn, the wearer's body

heat protects it from such extreme temperature fluctuations.

- Do not handle the watch roughly (hitting, dropping it etc.).
- Do not fasten the strap too tight. There should be a finger-wide gap between the wrist and the strap.
- The watch should be stored in a dry place.
- Keep the watch away from gasoline, cleaning solvents, aerosols from sprayers, adhesives, paints, etc.
- Chemical reactions caused by these materials can damage the seals, the case and protective covering of the watch.
- The sapphire crystal is relatively strong, and has a special anti-scratch coating, but it may crack if the watch is dropped or hit.
- Avoid storing your watch with jewelry containing diamonds, as these can damage the sapphire crystal.
- Store your watch in a separate, preferably specially designed case, lined with a soft protective material.

TECHNICAL SPECIFICATIONS

Case diameter	42 mm
Case material	Steel 316L
Strap width	20 - 22 mm
Strap material	Genuine leather
Type of glass	Sapphire crystal
Accuracy at normal temperatures	- 15 - +40 seconds per day
Movement	Mechanical, manually wound 3603 movement, with 18 carats
Power reserve	40 hours
Water resistance	10 ATM

WARRANTY CONDITIONS

The warranty applies only to products purchased from authorized sales representatives.

The manufacturer's warranty is 1 (one) year from the date of the product's sale. The warranty covers defects and faults in assembly and materials. If the watch is found to be faulty within the warranty period, the manufacturer undertakes to remedy the faults or malfunctions free of charge. If the repair fails to return the watch to its previous quality, the manufacturer guarantees that it will replace the watch with another of the same model or a model with identical characteristics. Repairs should only be carried out by authorized service centers. The contacts of authorized service centers are provided by an authorized sales representative.

EXCEPTIONS

The warranty does not cover:

- the glass and strap;
- defects in the watch caused by its use (e.g. scratches on the glass, changes in the color and/or material of non-metallic belts and bracelets, etc.);
- any damage to any part of the watch caused by misuse, neglect, or carelessness (shock, potholes, dents, cracks, etc.);
- any unauthorized repair or unauthorized interference with the interior and/or exterior of the watch will automatically invalidate the warranty;
- moisture getting into the watch because it is used underwater while the winding crown is not in the fixed position.

WARRANTY CARD

All warranty repair claims must be accompanied by a warranty card filled in by both the buyer and the seller of the watch.
